Bugs

The following bug fixes have been made since the release of Petra Standard 2024 v3.18.0:

Petra 2024 Hot Fix 2 - Release (October 28, 2025)

Description	Case
Manually updating production with a filtered year saves only the visible data.	02583698 02941230
Zone query search displays wells corresponding to the items selected.	02761982
Entering survey data manually, the Tab key now moves smoothly through all columns.	02765085
Map module phantom border issue is now resolved.	02792353
Computing percent in zone now reflects accurate results.	2694626 02833531
X-section overlay drawn nodes now remain visible.	
Ctrl+U and Teams paste issue is now resolved.	
Workflow handling in the Map module now eliminates phantom border issue.	
Zone items do not get erased after applying zone query with any item option.	
Min/Max value issue for any item in zone option is now resolved.	
Re-routed 298 import to 298 EZ loader.	
Fixed help links for all data tabs in Main module	

Petra 2024 Hot Fix 1 - Release (April 8, 2025)

Description	Case
A problem with resizing the digital log aliasing window and the alias order option has been fixed.	02451633
The Sample Grid to Wells option with horizontal wells now produces the correct formation top MD values.	02697800 02699544
An issue with the “Data exactly Matches Value” option when posting in the Attribute Map now works as expected.	02607221
Selecting and moving objects when zoomed in to the Map with Magnify now works as expected.	01807905; 01970249 02132589; 02491398 02518213; 02522097 02543310; 02645526
Using Magnify in map now zooms to the center of the screen and no longer produces artifacts when scrolling.	02582212

© 2025 S&P Global.All rights reserved.

Null option when searching for zone data by date now returns wells as expected.	02554342 02566267 02671926
Plotting depth tick labels along a deviated well path in Map no longer posts SSTVD instead of TVD.	02557218 02417235
An issue with the “Delete Item for this Well” option for production data has been fixed.	
When updating the date field in zone data, the auto-fill value now accurately begins with ‘20’ rather than ‘19’.
